ST FRANCIS CATHOLIC SECONDARY SCHOOL, LAGOS

The Jesuit-Run Catholic College

PHYSICAL & HEALTH EDUCATION

JSS 1

First Term

2026/2027

FIRST TERM SCHEME OF WORK.

WEEKS	TOPICS
1	Brief history of physical education in Nigeria. Meaning of physical and health education.
2	Differences between physical education and health education.
3	Physical fitness and body conditioning programme.
4	Importance and characteristics of a physically fit person.
5	Exercise to develop the different components of physical fitness
6	Personal health
7	Continuous assessment
8	Sewage and sewage disposal
9	Refuse and refuse disposal
10	Water supply
11	Revision
12	Examination

WEEK 1

Date	
Topic	Introduction to physical and health education.
Learning objectives	By the end of the lesson, students should be able to: i. Explain the meaning of physical education ii. Explain the meaning of health education iii. Mention five branches of physical education iv. List five scope of health education v. Identify three reasons why the early man engaged in physical education. vi. Mention three instruments used for killing animals in ancient times.
Insight/Introduction	Exercise and balanced diet are very important
Key words/New terms	Health Social development
Application/Contextualization	Schools Community centres Fitness facilities Work places
Summary	In this topic, the students learnt that: Physical education is the training of the body and mind through physical activities. Health education is the acquisition of health knowledge for a healthy living. Disease is a departure or deviation in the normal functioning of the body system. The early men engaged in physical education for survival, escape from wild animals, for protection. The branches of physical education are; Recreation, Athletics, Gymnastics, etc.
Student Engagement: **i. What have I learnt?** **ii. Skills acquired**	
My Question(s) /Evaluation	i. ii. iii. iv.
Action Goal	

WEEK 1

HISTORY OF PHYSICAL EDUCATION IN NIGERIA.

Physical education in Nigeria was developed from traditional African culture where physical activities such as wrestling, running, dancing and hurting were part of daily life. There activities were done for both recreational and functional purposes.

After Nigeria gained independence in 1960, Physical Education became more popular in schools. It was recognized as an essential aspect of education because of its contribution to the mental and social development of individuals.

MEANING OF PHYSICAL AND HEALTH EDUCATION

Physical Education is an integral(important) part of general education which is concerned with the total development of an individual (physically, socially, mentally, emotionally) and his/her health generally.

Physical Education is an integral part of general education which develops an individual to be physically fit, mentally alert, socially adjusted and emotionally stable through well selected, planned and programmed activities.

Areas covered by Physical Education include;

1. Physical Areas, which develops the muscles, bones, joints, nerves, etc.

2. Emotional Areas, which develops the ability to be humble in victory and accepting defeat gracefully.

3. Social Areas, which develops the ability to interact with other people.

4. Mental Areas, which develops the ability to think and make decisions under pressure.

REASONS WHY THE EARLY MEN ENGAGED IN PHYSICAL EDUCATION

The following are some of the reasons why the early men engaged in physical education:

1. For food.

2. For survival.

3. For escape from wild animals.

4. For recreation.

5. In search of a comfortable place to live.

MEANING OF HEALTH EDUCATION

Health, according to World Health Organization (WHO),1962, is a state of complete physical, mental and social well-being of an individual and not merely absence of disease or infirmity.

Health Education therefore, can be defined as the process of acquiring health knowledge and skills necessary for healthy living.

Or

Health Education is a branch of education which aims at training and developing an individual to have a good healthful living habits which in turns helps the individual live a life free of diseases.

RELATIONSHIP BETWEEN PHYSICAL EDUCATION AND HEALTH EDUCATION

Physical education and health education are inter-related. There is physical education in health education and there is health education in physical education. In other words, they are like twin brothers or sisters that cannot be separated. Therefore, the relationship between physical education and health education are;

1. They promote the well-being of the people.

2. Excessive fat are removed through carefully selected physical activities.

3. Health education helps to instill good personal cleanliness during and after physical exercises. For example, rubbing down after strenuous physical education activities.

4. They encourage the wearing of suitable sports outfit/clothing.

5. Physical education helps in regular inspection and maintenance of sporting equipment and facilities in order to avoid or reduce injuries during physical activities.

PURPOSES OF PHYSICAL AND HEALTH EDUCATION

The main purpose of physical and health education is to develop an individual and youths to be responsible(good) citizens. Other purposes of physical and health education are;

1. Good knowledge in the field of sport

2. For the development of physical fitness.

3. For the acquisition of useful skills in sports and games.

4. Development of acceptable social habits.

5. Development of safety habits during play.

6. Ability to enjoy recreation.

7. Correction of bodily defects.

8. Character training and team spirit.

9. Ability to control one's temper.

10. To provide opportunity for maximum enjoyment through participation in sports and games.

11. To provide career opportunity.

12. To create safety rules awareness.

13. For the encouragement of good sportsmanship emotionally stability.

WEEK 2

Date	
Topic	Differences between physical education and health education
Learning objectives	By the end of the lesson, students should be able to: i. State the aims of physical education. ii. State three aims of health education iii. Examine the differences between physical education and health education. iv. Mention five scope of physical education. v. List six branches of health education. vi. Explain the organogram of physical education and health education.
Insight/Introduction	Engaging in physical activities and proper maintenance of the body and environment is very important.
Key words/New terms	Exercise Health
Application/Contextualization	Schools Community centers. Fitness facilities Home and family Public health initiatives
Summary	In this topic, the students learnt the following: The aims of physical and health education and the differences between physical education and health education.
Student Engagement: **i. What have I learnt?** **ii. Skills acquired.**	
My Question(s) /Evaluation	i. ii. iii. iv.
Action Goal	

WEEK 2

DIFFERENCES BETWEEN PHYSICAL EDUCATION AND HEALTH EDUCATION

Both physical education and health education are related. Meaning, they are cannot be separated from each other but different fields.

Below are some of those things that make them different:

1. Physical education focuses on developing physical fitness, motor skills, and athletic abilities through various physical activities, sports and exercises. While health education focuses on teaching individuals about healthy behaviors, wellness and disease prevention.

2. Physical Education aims to promote physical performance, coordination, and overall physical well – being. While health education covers topics like nutrition, hygiene, mental health, substance abuse and safety.

3. While physical education involves structured classes, sports and games, health education aims to empower individuals with knowledge and skills to make informed decisions about their health.

In conclusion, while Physical Education emphasizes physical activity and fitness, Health education emphasizes knowledge and behaviors that promote overall well – being. Both are essential for a healthy lifestyle.

SCOPE OF PHYSICAL EDUCATION AND HEALTH EDUCATION

Physical Education is a subject that covers all physical activities that are performed both indoors and outdoors for physical and social benefits. Likewise, health education is a subject that helps an individual to live and maintain a healthy life. Therefore, the scope of Physical Education include the following:

1. Games and sports.

2. Rhythmic and dance.

3. Aquatics.

4. Hunting.

5. Gymnastics.

6. Recreation.

7. Fundamental movement and body mechanics.

8. Athletics.

9. Combative sports or Martial arts

10. Physical fitness and body conditioning programme.

The following are the scope of health education:

1. Personal health.

2. Food and nutrition.

3. First aid and safety education.

4. Diseases(Communicable and non-communicable).

5. Environmental health.

6. Consumer health.

7. Community health.

8. Drug Education.

9. Family planning.

10. Sex Education.

ORGANOGRAM OF PHYSICAL EDUCATION

This is defined as the chart or diagram representing or showing all the branches of physical education.

LEAVE SPCAE FOR THE DIAGRAM

ORGANOGRAM OF HEALTH EDUCATION

This can be defined or explained as the diagram showing all the branches or contents of health education.

LEAVE SPACE FOR THE DIAGRAM

Assignment:

Make an organogram of the branches of physical education and that oh Health education in your BST 3 assignment note.

WEEK 3

Date	
Topic	Physical fitness and body conditioning programme
Learning objectives	By the end of the lesson, students should be able to: i. Explain the meaning of fitness and physical fitness. ii. Mention two components of physical fitness. iii. Differentiate between health and performance – related components of physical fitness. iv. Mention five examples of performance –related and health – related components of physical fitness. v. Draw the organogram of health and performance – related components of physical fitness.
Insight/Introduction	Physical fitness helps to reduce tension and fatigue.
Key words/New terms	Strength, Flexibility, Agility, Speed, Balance, Muscular endurance, Muscular strength etc.
Application/Contextualization	Community centers. Fitness facilities Home and family Public health initiatives
Summary	The students learnt the following: Meaning of health – related and performance –related components, differences between health and performance -related components, examples of health and performance –related components .
Student Engagement: **i. What have I learnt?** **ii. Skills acquired.**	
My Question(s) /Evaluation	i. ii. iii. iv.
Action Goal	

WEEK 3

PHYSICAL FITNESS AND BODY CONDITIONING PROGRAMME.

DEFINITION OF FITNESS: -

This is the ability to live a life that is balanced and complete. It is a state of physical, mental, emotional, social and spiritual well-being. It means that fitness refers to the totality of the functions of a person operating co-operatively with one another. It implies the person's capacity to survive and live effectively in his environment.

MEANING OF PHYSICAL FITNESS

Physical fitness can be defined or explained as the ability or capacity of a person to carry out every day activities (work and play) without undue fatigue and with enough energy in reserve for emergencies.

MEANING OF BODY CONDITIONING PROGRAMME.

Body or physical conditioning is the use of regular and systematic exercises in getting the body ready for sports and other activities demanding sustained effort.

TOTAL FITNESS AND WELLNESS:-

This has to do with the ability to live a well balanced life physically, mentally, emotionally and socially.

TYPES OF BODY CONDITIONING PROGRAMME.

1. General body conditioning programme.

2. Specific body conditioning programme.

COMPONENTS OF PHYSICAL FITNESS.

The components of physical fitness are:

1. Health-related components of physical fitness.

2. Performance-related components of physical fitness.

DIFFERENCES BETWEEN HEALTH-RELATED AND PERFORMANCE-RELATED COMPNENTS OF PHYSICAL FITNESS.

Health-related components of physical fitness is concerned with the health status of an individual. While performance-related components of physical fitness are the abilities needed by a person to excel in the various sporting activities.

Examples of health-related components of physical fitness include;

1. Muscular strength.

2. Muscular endurance.

3. Cardio-respiratory endurance.

4. Flexibility.

5. Body composition.

6. Resistance to diseases.

Examples of performance-related components of physical fitness are;

1. Agility.

2. Power.

3. Speed.

4. Neuro-muscular coordination.

5. Balance.

6. Quick reaction time.

WEEK 4

Date	
Topic	Importance and characteristics of a physically fit person
Learning objectives	By the end of the lesson, students should be able to: i. State five importance of physical fitness. ii. Mention ten characteristics of a physically fit person.
Insight/Introduction	Physical fitness helps to reduce tension and fatigue.
Key words/New terms	Strength Flexibilty Agility. Speed Balance Muscular endurance Muscular strength, etc.
Application/Contextualization	Schools Community centers. Fitness facilities Home and family Public health initiatives
Summary	In this topic, the students learnt the following: The importance, characteristics of a physically fit person and basic principles of physical fitness.
Student Engagement: **i. What have I learnt?** **ii. Skills acquired.**	
My Question(s) /Evaluation	i. ii. iii. iv. v.
Action Goal	

WEEK 4

IMPORTANCE OF PHYSICAL FITNESS

1. It makes us live a happy and enjoyable life.

2. It helps to control obesity.

3. It helps us to participate adequately in sports.

4. It makes the body strong and healthy.

5. It keeps the heart in good working condition.

6. It helps to strengthen the bones and muscles.

7. It aids blood circulation and proper breathing.

8. It helps to lose excess weight.

9. It gives a trim and firm body shape.

10. It reduces the risk of contracting some diseases.

11. It prevents the bones and joints from becoming stiff and reduces pain.

12. It helps an individual to sleep comfortable

BASIC PRINCIPLES OF PHYSICAL FITNESS.

The basic principles of physical fitness as contained in the U.S Army Fitness Training Handbook are;

1. Progression.

2. Regularity.

3. Overload.

4. Variety.

5. Recovery.

6. Balance.

7. Specificity.

CHARACTERISTICS OF A PHYSICALLY FIT PERSON.

1. He/she must maintain a good posture.

2. He/she must eat a balanced diet.

3. He/she must be able to resist disease or ailments.

4. He/she must possess the ability to perform daily routines without getting tired.

5. He/she sleeps better and has good mood.

6. He/she recovers quickly from illness.

7. A physically fit person has a healthy attitude to life.

8. A physically fit person can think independently and constructively.

9. A physically fit person has good judgment, very resourceful, happy and confident.

10. A physically fit person reacts quickly to an emergency situation.

11. A physically fit person enjoys playing games, sports and other recreational activities.

WEEK 5

Date	
Topic	Exercises to develop the different components of physical fitness
Learning objectives	By the end of the lesson, students should be able to: i. List six types of physical fitness items. ii. Mention three exercises that can be used to develop muscular endurance. iii. Itemize four exercises that can be used to develop balance. iv. List three exercises that can be used to develop neuro – muscular coordination. v. State five safety precautions when performing physical fitness activities.
Insight/Introduction	Physical fitness items helps to improve various skills in individuals, as a result of continuous or regular participation in sports.
Key words/New terms	Strength, Flexibility, Agility, Speed, Balance, Muscular endurance, Muscular strength Neuro –muscular coordination, etc.
Application/Contextualization	Schools Community centers. Fitness facilities Home and family Public health initiatives
Summary	In this topic, the students learnt the following: Exercise to develop the different components of physical fitness, such as football, jogging, walking on a balancing beam, boxing, wrestling, etc. Safety precautions during physical fitness activities.
Student Engagement: **i. What have I learnt?** **ii. Skills acquired.**	
My Question(s) /Evaluation	i. ii. iii. iv.
Action Goal	

WEEK 5.

EXERCISES TO DEVELOP THE DIFFERENT COMPONENTS OF PHYSICAL FITNESS

1. EXERCISE TO DEVELOP MUSCULAR STRENGTH

i. Climbing.

ii. Bicep curls.

iii. Bench press.

iv. Leg press.

v. Isometric push-up.

vi. Isotonic pus h-up.

vii. Squatting.

viii. Standing Broad jump.

ix. Sit-ups.

x. Shoulder press.

2. EXERCISES TO DEVELOP MUSCULAR ENDURANCE

i. Pull-ups.

ii. Arm dips.

iii. Chin-ups.

iv. Press-ups.

v. V-sits.

vi. Push-ups.

vii. Flexed arm hang.

viii. Cycling.

3. EXERCISES TO DEVELOP AGILITY

i. Shuttle relay.

ii. Headstand.

iii. Backward roll.

iv. Prone lying.

v. Playing ball games. e.g. Handball, Basketball, Football.

vi. Wrestling.

4. EXERCISES TO DEVELOP SPEED.

i. Running.

ii. Swimming.

iii. Football.

5. EXERCISES TO DEVELOP FLEXIBILITY.

i. Stretching.

ii. Yoga.

6. EXERCISES TO DEVELOP CARDIO-RESPIRATORY ENDURANCE.

i. Swimming.

ii. Long distance races.

iii. 400m walking race.

iv. Bench step.

v. Squat thrust.

vi. Dancing.

vii. Aerobics.

7. EXERCISES TO NEURO-MUSCULAR COORDINATION.

i. Handball.

ii. Basketball.

iii. Football.

iv. Jogging.

8. EXERCISES TO DEVELOP BALANCE.

i. Balance walk.

ii. Crouch balance.

iii. Standing on one leg.

iv. Headstand.

v. Figure skating.

9. EXERCISES TO DEVELOP QUICK REACTION TIME.

i. Catching a shot in soccer.

ii. Dodging in basketball.

iii. Peddling to sudden break when riding a bicycle.

10. EXERCISES TO DEVELOP ACCURACY.

i. Passing in Football.

ii. Shooting in Handball.

iii. Throwing and catching in basketball.

iv. Shooting in catapult.

v. Archery, etc.

11. EXERCISES TO DEVELOP POWER.

i. Throwing.

ii. Running.

iii. Jumping.

SAFETY PRECAUTIONS DURING PHYSICAL FITNESS.

1. Warm up before performing any strenuous exercises.

2. Always move from simple to complex exercises.

3. Have a good knowledge and skill of the exercises you want to perform.

4. Avoid distractions during performance of any activity.

5. Inspect all equipment needed for the exercises before use.

6. Ensure you are certified medically fit for the exercise.

7. Wear light clothing.

8. Perform an exercise repeatedly and regularly to get a better result.

9. Remove all harmful or dangerous objects in the place of exercise.

10. Split or share the exercise very well to develop every muscle of the body.

11. Follow the instructor's instructions.

12. Rubdown after every strenuous activity.

WEEK 6

Date	
Topic	Personal Health
Learning objectives	By the end of the lesson, students should be able to: i. Explain the concepts of personal health. ii. Mention five components of personal health. iii. State six objectives of personal health. iv. Examine five importance of personal health. v. Itemize five determinants of health.
Insight/Introduction	Personal health helps an individual acquire the basic knowledge, skills, attitudes and practices of how to maintain a healthy living.
Key words/New terms	Heredity Determinants Lifestyle. Health.
Application/Contextualization	Schools Community centers. Home and family Public health initiatives
Summary	The concept of personal health, determinants of health, importance and objectives was learnt in this topic.
Student Engagement: **i. What have I learnt?** **ii. Skills acquired.**	
My Question(s) /Evaluation	i. ii. iii. iv. v.
Action Goal	

WEEK 6

PERSONAL HEALTH

CONCEPT OF PERSONAL HEALTH

Personal health is defined as the way an individual or a person lives a healthy, good and responsible life, eating a good balanced diet, taking regular exercise, drinking good and clean water, wearing clothes, free from diseases, providing good environmental sanitation and maintaining good personal cleanliness of the body.

COMPONENTS OF PERSONAL HEALTH

1. Physical aspect.
2. Emotional aspect.
3. Social aspect.
4. Spiritual aspect.
5. Intellectual aspect.
6. Occupational aspect.

OBJECTIVES OF PERSONAL HEALTH

1. To promote good health and positive behavioral change in an individual.
2. To encourage good practices.
3. To encourage people to adopt and sustain health promoting lifestyle and practices.
4. To promote the proper use of health services available to them.
5. To reduce the high rate of disease attack.
6. To develop and promote mental and emotional health.
7. To provide information about health and hygiene.

IMPORTANCE OF PERSONAL HEALTH

1. It helps to prevent illness and diseases.
2. It helps to improve the life span of an individual.
3. It provides protection against occurrence of uncertain diseases or illness.

4. It helps to keep oneself physically and mentally healthy.

CLASS DISCUSSION:

How can a student take care of the following body parts?

i. mouth

ii. eye

iii. skin

iv. hair.

WEEK 7

MID TERM TEST

WEEK 8

Date	
Topic	Sewage and sewage disposal
Learning objectives	By the end of the lesson, students should be able to: i. Explain the concepts of personal health. ii. Mention five components of personal health. iii. State six objectives of personal health. iv. Examine five importance of personal health. v. Itemize five determinants of health.
Insight/Introduction	Personal health helps an individual acquire the basic knowledge, skills, attitudes and practices of how to maintain a healthy living.
Key words/New terms	Heredity, Determinants, Lifestyle, Health.
Application/Contextualization	Schools Community centers. Home and family Public health initiatives
Summary	The concept of personal health, determinants of health, importance and objectives was learnt in this topic.
Student Engagement: **i. What have I learnt?** **ii. Skills acquired.**	
My Question(s) /Evaluation	i. ii. iii. iv. v.
Action Goal	

WEEK 8

SEWAGE AND SEWAGE DISPOSAL

Sewage can be defined as the liquid waste such as water, urine and faeces coming out from homes, school or industries. Or

Sewage can be defined as the mixture of faeces and urine.

Or

Sewage means the liquid waste from human body and contaminated water from houses and industries.

SEWAGE DISPOSAL :- Sewage disposal is defined as the process or transporting or carrying and disposing human waste from the environment safely. When sewage is disposed and exposed, it decompose quickly thereby serving as a good or rich breeding place for rodents like rats, cockroaches and animals.

Indiscriminate passing of urine and faeces can lead to the spread of disease of the alimentary canal. Overcrowding is also a factor leading to the problem of sewage disposal owing to the reduced rate of toilet facilities.

METHODS OF SEWAGE DISPOSAL.

1. Pit latrine.

2. Water system

3. Bucket latrine.

4. Septic tank latrine:

5. Surface latrine.

1. PIT LATRINE :- This type of latrine has a hole or a pit dug in the ground for passing out urine and faeces. The latrine is commonly used in the rural communities or village.

2. WATER SYSTEM: This system is used where pipe- borne water is available with a septic tank. It is common in many modern homes and cities.

3. BUCKET LATRINE :- It is also known as PAIL LATRINE. It is a wooden table with a hole at the centre through which urine and faeces can pass into the bucket placed under. The faeces is removed either daily or at regular intervals by night soil men. The method is used in urban slums and is very unhygienic.

4. SEPTIC TANK LATRINE: It is the construction of an underground tank which is located away from the building and sewage flow into it through a pipe aided by water.

5. SURFACE LATRINE: They provide privacy but the sewage is spread on the surface. This is very unhygienic, the soil and water may become contaminated and flies and other vector thrive.

WEEK 9

Date	
Topic	Refuse and refuse disposal
Learning objectives	By the end of the lesson, students should be able to: i. Explain the meaning of sewage. ii. Define refuse disposal iii. List five examples of refuse. iv. Examine five methods of refuse disposal. v. Draw one equipment used for refuse disposal.
Insight/Introduction	Proper disposal of refuse helps to prevent diseases and promote healthy living.
Key words/New terms	Wastes Refuse Pit. Disposal. Sanitary landfill
Application/Contextualization	Schools Community centers. Home and family Public health initiatives Work places.
Summary	In this topic, the students' learnt the following: Meaning of refuse Definition of refuse disposal Types of refuse Methods of refuse disposal Equipment used for refuse disposal. Values or usefulness of refuse. Materials or things that can be recycled.
Student Engagement: **i. What have I learnt?** **ii. Skills acquired.**	
My Question(s) /Evaluation	i. ii. iii. iv.
Action Goal	

WEEK 9 TOPIC

REFUSE AND REFUSE DISPOSAL

CONCEPT OR MEANING OF REFUSE

Refuse can be defined as the solid waste material such as paper, old clothes, rags, leaves, cans, dead bodies, plastics found in the community.

Or

Refuse is defined as all solid or semi-solid or liquid wastes in the house, school, industries and community.

METHODS OF REFUSE DISPOSAL

Refuse disposal is the way and manner of getting rid of solid wastes from homes or industries which are carefully disposed to prevent health hazards in the society. Or

Refuse disposal is the collection, processing and recycling of waste materials from the human society.

Below are some of the ways of disposing refuse:

1. Sanitary landfill.

2. Open dump.

3. Composting.

4. Incineration.

5. Open burning.

6. Recycling of solid waste.

7.Burial(into the earth).

8. Hog feeding.

VALUES OR USEFULNESS OF REFUSE

1. It supply raw materials to industries.

2. It serves as a source of income to the economy.

3. It serves as employment opportunity to the jobless.

4. It serves as food for domestic and aquatic animals. Such as yam, cassava and banana peels.

5.They help to sustain the economy.

RECYCLING AND AGENTS RESPONSIBLE FOR REFUSE DISPOSAL

Recycling is defined as the process of turning waste materials sorted out and selected for recycling or reuse.

Recycling is processing used materials that would have been used.

MATERIALS THAT CAN BE RECYCLED

Some of the materials that can be recycled include:

1. Concrete.

2. Steel.

3. Aluminum.

4. Plastics (PETS) – Plastic water and beverage bottles.

5. Newspaper.

6. Corrugated cardboard.

7. Plastics (HDPE).

8. Glass.

9. Mixed papers.

10. Used motor oil.

HDPE simply means High Density Polyethlene. e.g. Opaque milk jugs, shampoo bottles, or other colored plastics. The HDPE is used to produced plastic bottles, plastic bags, etc.

AGENCIES RESPONSIBLE FOR REFUSE DISPOSAL IN NIGERIA.

The agencies are;

1. Federal Environmental Protection Agency (FEPA).

2. Lagos Waste Manage ment Authority (LAWMA).

3. Private Sector Participation (PSP).

4. National Environmental Standards Regulatory And Enforcement Agency (NESREA).

5. Ministry of Environment.

6. Ministry of Water Resources.

7.State’s Ministries of Environment.

WEEK 10

Date	
Topic	Water Supply
Learning objectives	By the end of the lesson, students should be able to: i. Define water. ii. Describe the meaning of water supply. iii. List five sources of water supply iv. Mention six qualities of good water. v. State five sources of water contamination vi. List five ways of treating and purifying water.
Insight/Introduction	Water is life and should be made available for our daily use. Water to be supplied must be treated properly, as it helps to prevent diseases and enhance healthy living. One should avoid drinking contaminated water.
Key words/New terms	Purification, Aquatic, Pipe- borne, Filtration, Drinkable, Impure.
Application/Contextualization	Schools Community centers. Home and family Public health initiatives Work places.
Summary	In this topic, the students' learnt the following : Definition of water Meaning of water supply Sources of water supply Qualities of good water Sources of water contamination. Treatment and purification of water.
Student Engagement: **i. What have I learnt?** **ii. Skills acquired.**	
My Question(s) /Evaluation	i. ii. iii. iv
Action Goal	

WEEK 10

WATER SUPPLY

CONCEPT OF WATER SUPPLY

Water can be defined as a liquid necessary for sustaining the life of human beings, animals and plants. It is one of the natural resources that covers about 80 percent of the earth's surface and IT is important in our everyday life.

CLASSIFICATION OR TYPES OF WATER SUPPLY

Water can be classified into two. They are;

1Natural sources of water supply.

2. Artificial sources of water supply.

Natural sources of water supply include:

1. Rain.

2. Lakes.

3. Streams.

4. Rivers.

5. Springs.

6. Ponds.

7. Oceans.

8. Brooks.

Artificial sources of water supply are;

1. Pipe-borne water.

2. Dams.

3. Wells and tube wells.

4. Bore – hole.

5. Artificial lakes.

6. Artificial canals.

QUALITIES OF GOOD WATER.

The qualities of good water include;

1. Freedom from smell – odourless.

2. It must be tasteless.

3. A good water must be clean.

4. A good water must be free from disease/germs.

5. It must contain acceptable mineral composition.

6. Satisfaction.

7. Acceptable minerals composition.

8. Softness – Not hard, etc.

SOURCES OF WATER CONTAMINATION

Surface water can be polluted directly while underground water can be polluted indirectly when fetching. Some sources of water pollutants are:

1. Germs or pathogenic organisms.

2. Sewage and refuse

3. Fertilizers and industrial wastes.

4. Pesticides and insecticides.

5. Decayed plants and animals.

6. Animal grazing.

METHODS OF WATER STORAGE

The following are some of the methods of storing water:

1. Water storage tanks.

2. Water drums.

3. Dams.

4. Reservoirs.

5. Water barrels.

6. Regular water bottles.

7. Water jugs.

8. Empty bottles.

9. Local pots, etc.

TREATMENT AND PURIFICATION OF WATER

The water we drink can be made through the following methods of water purification:

1. Boiling

2. Filtration

3. Addition of chemicals like, alum, chlorine, etc

4. Storage and sedimentation

5. Water treatment plant process.

ASSIGNMENT:

Draw two materials that can be used to store water at home.
