ST FRANCIS CATHOLIC SECONDARY SCHOOL, LAGOS

The Jesuit-Run Catholic College

BUSINESS STUDIES NOTE

JSS 1

FIRST TERM

2026/2027

WEEKS	TOPICS	SUB TOPIC
1	Introduction to Business studies	Meaning of business studies, components of business studies Importance of business studies, career opportunities in business studies
2	Office	Meaning of an office, differentiate between types of an office, functions of an office. Identify the departments in an office and their functions
3	Office staff	Describe office staff, state the duties and qualities of various office staff Discuss the use of artificial intelligence (AI) and robotics in facilitating office work Impacts and potential impacts of AI and robotics on staffing use AI in performing a given secretarial task.
4	Office equipment	Definition, types and uses of office equipment, importance of various office equipment in business. Select appropriate office equipment for various tasks, maintain and care for office equipment
5	Introduction to commerce	Meaning, importance, division of commerce. Activities that aids commerce
6	Production and service delivery	Meaning and types of production Effects of production on environment and society Factors of production, knowledge and service economy. Opportunities in knowledge and service economy The roles and impacts of robots in production
7	Cashless economy	Meaning, purpose. Digital payment systems. Challenges of businesses and consumers in a cashless economy. Mitigation of challenges encountered by business and consumers in a cashless economy
8	Digital currency	Meaning, types, benefit, risk and how to mitigate risks
9	Digital technologies in business	Meaning and importance Basic digital tools in business operation The concept of responsible digital citizenship Use digital technology in business practices
10	Digital technologies in the financial industry	Meaning, types, uses of digital technologies in business Challenges posed by digital technologies in the financial industry and how to overcome them Use digital technologies in book keeping practices
11	Revision	
12	Examination	

Date	
Topic	**INTRODUCTION TO BUSINESS STUDIES**
Objectives	i. Explain the meaning of business studies ii. State the importance of business studies iii. Identify the components of business studies iv. List the career opportunities in business studies
Insight	We do business in every part of the world We do different types of business
Key words/New terms	Acquired basic skills The component part of business studies Office procedures
Application	What type of business will you like to do?
Summary	Business studies provides us with the necessary skills for production work Whatever people do to make a living , they are using business concepts You can succeed by working for someone else or setting up your own business
Student engagement: i. What have I learnt? ii. Skills acquired	
My Question(s)/Evaluation	
Action	

INTRODUCTION TO BUSINESS STUDIES

Business studies is a subject which exposes students on how commercial or economic activities are carried out on a daily basis.

It can also be defined as the subject which makes students understand what constitute business and the skills needed in doing them.

Business studies can also be defined as an area of study that teaches the principles of setting up and running a business profitably.

Everyone engages in one business activity or the other because it fetches them income needed to survive in life.

IMPORTANCE OF BUSINESS STUDIES

1. It prepares students for future career.
2. It teaches you how to establish and run private businesses efficiently.
3. It creates job opportunities.
4. It provides basic knowledge needed to run a business.
5. It provides basic techniques needed to prevent business failures and losses
6. It provides basic keyboarding skills which help businessmen in the effective use of internet and other devices for business activities
7. It exposes students to basic office ethics.
8. It helps students to identify the types of transactions and to open the necessary books of account required in modern business activities.

COMPONENTS/SCOPES OF BUSINESS STUDIES

Components of business studies means the subjects that make up Business studies

The following are the components of Business Studies:

1. Office Practice
2. Commerce
3. Bookkeeping
4. Marketing
5. Digital literacy

6. Entrepreneurship

OFFICE PRACTICE: This has to do with how clerical activities are carried out on daily basis in an establishment to achieve set goals. It is the study of the management of an office used for business activities.

COMMERCE: This deals with trading (buying and selling of goods and services), distribution and all those activities that help in buying and selling.

BOOKKEEPING: This deals with keeping financial records of day to day activities and transactions in an orderly manner.

MARKETING: This involves promotion and sales of goods and services by understanding customers' need and convincing them to buy a particular product or brand.

DIGITAL LITERACY: This involves the ability to use digital technologies effectively and responsibly to find, create and share information.

ENTREPRENEURSHIP: This can be defined as the act of forming and running a business with the aim of making profit and be financially independent.

CAREER/EMPLOYMENT OPPORTUNITIES IN BUSINESS STUDIES

1. Stock broker
2. Banker
3. Accountant.
4. Cashier
5. Salesman
6. Marketer
7. Computer operator
8. Trader
9. Insurance broker
10. Transporter

Date	
Topic	**THE OFFICE**
Objectives	i. Define an office ii. Differentiate between types of offices iii. Mention the functions of an office iv. List the types of office layout/design in an office v. Features of office layout vi. identify the departments in an office and their function
Insight	An office is a place or a room where clerical activities of a business are carried out
Key words/New terms	Activities carried out in an office Office layout or design
Application	Where is the Administrators office? Have you ever been to your parents offices?
Summary	The clerical activities of an organization are carried out in an office The office is the nerves centre of every organization An office can be small or large The size of an organization depends on the nature of the business Useful information can be sent from an office Various equipment can be used in an office
Student engagement: i. What have I learnt? ii. Skills acquired	
My Question(s)/Evaluation	
Action	

THE OFFICE

An office is a room set aside for clerical activities. It is a place in an organization where the activities of that organization are coordinated. The office is therefore the nerve centre of any establishment. It is a place where policies are formulated. Planning and organization in connection with the distribution of goods and services are also done in an office.

TYPES OF OFFICE

The advancement in technology and massive improvement in digital communication has expanded the two types of office to include a third, namely:

- Small office
- Large office
- Flexible workplace

SMALL OFFICE: This type of office is normally used by small business owners because little clerical activities are carried out. Workers are not many in small office and very few office equipment are used.

LARGE OFFICE: Big organizations with large volume of clerical activities usually have large office. Here, the activities carried out are specialized hence various departments are usually created. Large offices could be found in government ministries, banks etc.

FLEXIBLE WORKSPACE: is a work arrangement that allows workers to decide when, where and how they work rather than been fixed or limited by their employers

DIFFERENCES BETWEEN SMALL AND LARGE OFFICE

Small office	**Large office**
Less than ten workers	More than ten workers
Volume of clerical activities is small	Volume of clerical activities is high
Variety of work is done	Work is limited to departmental functions
There is no specialization	There is specialization
Departments are not usually created	Departments are usually created
Opportunity for advancement is restricted	There is room for advancement
Employee-employer relationship is close	Employee-employer relationship is not very close
Office equipment used are not many	Office equipment used are many

OFFICE LAYOUT/DESIGN

Office layout is the arrangement of the office to enhance the workflow in an organization.

In terms of layout, there are two types of office layout or design. They are:

1. The Open Office: This is a system of office design where workers stay together with their colleagues in one large room to work. It has a large floor space but no dividing walls or partitions. Examples are staff room, banking hall etc.

2. The Closed Office: This is a system of office design where a small room is occupied by only one officer. It is usually partitioned in most large organizations into small room or office for a particular officer to have privacy in the performance of normal office routine.

DIFFERENCES BETWEEN OPEN AND CLOSED OFFICE

Open office	**Closed office**
Easy supervision	Does not give room for effective supervision
Office equipment can easily be shared	Office equipment cannot easily be shared
Close relationship among workers	Does not encourage close relationship among workers
Free flow of information	Communication is more difficult
Gossiping is common	Gossiping is not common
Noise making is also common	Noise making is reduced
The spread of infectious disease is fast	Infectious disease cannot spread easily
No privacy	There is privacy. (Confidential matters are better handled).

FUNCTIONS OF OFFICE

The basic functions of an office include

- **Giving information:** This is the clerical activity that involves sending messages, ideas, views and opinions to people within and outside the organization. It could be through receipts, invoices, text messages etc.
- **Receiving information:** The office collects important information concerning its workers, customers, clients etc. for future decision making. The information may be in form of enquiries, reports, orders, circulars complaints etc.
- **Recording information:** The information received or sent from the office are recorded in relevant books so that they are not forgotten.
- **Arranging information:** For easy processing and fast decision making, similar information are arranged together in a file for easy action.

- **Processing information:** Processing information is the act of taking necessary action or decision on a matter. Information received in the office is sent to the office concerned for necessary action.
- **Storing information:** Vital documents of the organization are arranged in files and stored in the office for future use.

DEPARTMENTS IN AN ORGANIZATION

The size and type of work done in an organization determines the number of departments.

Some of the departments commonly found in most large organizations include:

1. Administrative department
2. Personnel department
3. Production department
4. Purchasing department
5. Sales/marketing
6. Finance/Accounting department
7. Transport department
8. Planning department

ADMINISTRATIVE DEPARTMENT

This department is headed by the administrator or administrative manager. The functions include:

- Coordinates the activities of all other departments
- Formulates the policies and objectives of the organization.
- Set up plans on how to implement the policies

PERSONNEL DEPARTMENT

- This department is headed by the personnel manager. Its functions include:
- Staff welfare and motivation.
- Recruitment/employment of new staff.
- Training, transfer, promotion of workers.
- Discipline and dismissal etc.

PRODUCTION DEPARTMENT

- This section of the organization deals with manufacturing of goods. It is headed by the production manager. The functions include:
- Turning of raw materials into finished goods.
- It ensures that goods are produced in the right quality and quantity.

PURCHASING DEPARTMENT

This department is headed by purchasing manager and has the following functions:

- Buying of raw materials.
- Buying of equipment needed in the organization.
- Storing of materials and issuing out materials in its store room on request from other departments.

SALES/ MARKETING DEPARTMENT

This department is headed by sales or marketing manager. It has the following functions:

- They create awareness of product to customers
- They are concerned with the selling of goods manufactured by the organization
- They listens to customer complaint

FINANCE/ACCOUNTING DEPARTMENT

- This department is headed by chief accountant or finance manager. Its functions include:
- To prepare and pay wages and salaries to workers.
- To keep records of financial matters of the organization.
- To release money for time to time when purchases are to be made.
- To prepare budget

TRANSPORT DEPARTMENT

- This department is headed by the transport manager and has the following functions:
- Moving raw materials and finished goods in and out of the organization.
- Responsible for the repairs and maintenance of the vehicles of the organization.

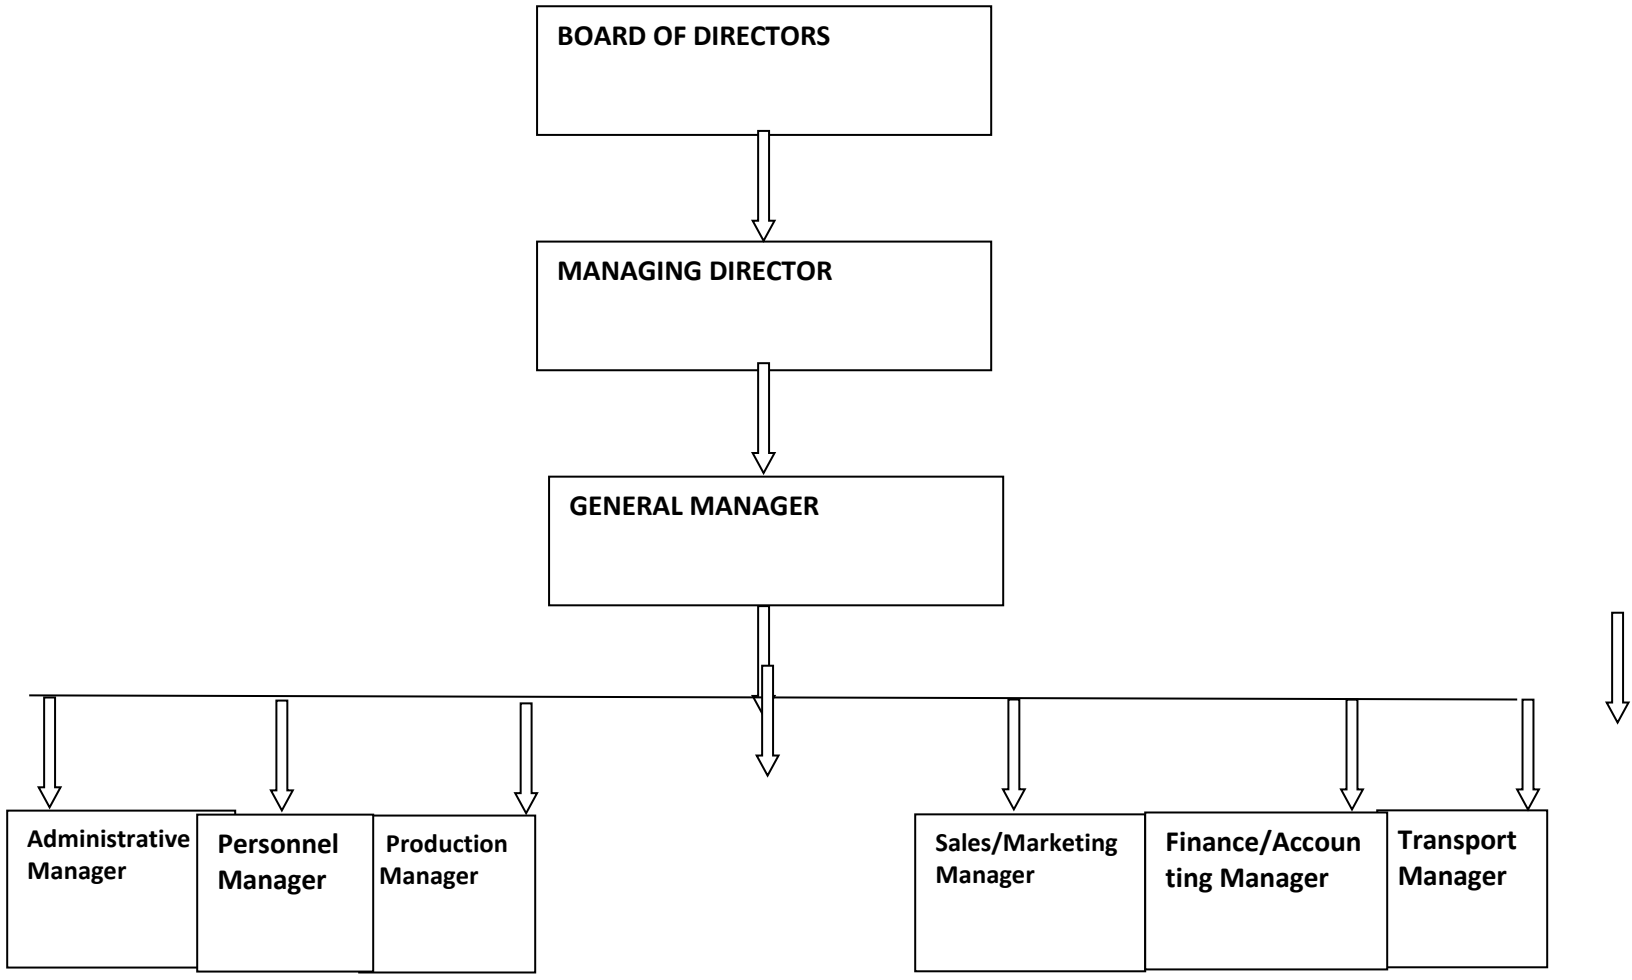

PLANNING DEPARTMENT

This department is headed by planning manager and has the following functions

- Planning the business activities of the organization
- Research into areas that will improve its wealth.

ORGANIZATIONAL CHART

This can be defined as a graph representation of an organizational structure. It is a chart which shows the arrangement of the separate parts of any business set up

Date	
Topic	**OFFICE STAFF**
Objectives.	The students should be able to : i. define an office staff ii. states the duties of office staff iii. mention the qualities of office staff iv. mention the use of Artificial intelligence and robotics in facilitating office work
Insight	Office staff are personnel responsible for the daily administrative, clerical, and operational tasks of a company, ensuring smooth business functions
Key words/New terms	Artificial intelligence Robotics
Application	The students should be able to know their duties and responsibility.
Summary	Office staff refers to personnel who perform clerical organizational and support duties within an office environment
Student engagement:	
My Question(s)/	
Action	

OFFICE STAFF

Office staff refers to all employees working in an office setting, whose duties may include clerical, secretarial and administrative support functions.

DUTIES OF OFFICE STAFF

The duties performed by office staff vary from office to office based on tittle and the nature of the job to be performed.

Some of these duties are:

1. Receiving correspondence

2. Recording of incoming and outgoing mail

3. Dispatch of office correspondence

4. Maintaining and updating both physical and digital files

5. Locating and filing of letters

6. Receiving and directing visitors

7. Attending to customer's inquiries

8. Typing and collation of office correspondence

QUALITIES OF OFFICE STAFF

The essential qualities of an office staff can be classified into two and they are:

Personal and job qualities

Some personal qualities are:

1. Possession of sound educational background

2. Possession of good health

3. Neatness and good appearance

4. Politeness

5. Honesty

Job qualities are:

1. Punctuality

2. Loyalty

3. Confidentiality

4. Self- control

5. Interest in the job

USES OF ARTIFICIAL INTELLIGENCE (AI) AND ROBOTICS IN FACILITATING OFFICE WORK

The basic advantages of AI and robotics are

1. Increased efficiency and productivity through automation

2. Improved decision making from data analysis

3. Reduced human error

4. Enhanced customer experiences

5. AI can process large data sets quickly

IMPACT AND POTENTIAL IMPACTS OF AI AND ROBOTICS ON STAFFING

AI and robotics will impact staffing in the following areas:

1. Customer service representative

2. Receptionists

3. Accountants/ book keepers

4. Sales people

5. Research and analysis

6. Warehouse work

7. Insurance underwriting

8. Retail

Date	
Topic	**OFFICE EQUIPMENT**
Objectives	i. Define office equipment ii. Identify the types and uses of office equipment iii. Mention the uses of the office equipment iv. Discuss the importance of various office equipment in business v. Outline factors to be considered when selecting office equipment vi. Maintain and care for office
Insight	Office equipment are the assets and basic items required for the smooth running of the office.
Key words/New terms	Equipment Guillotine Franking machine
Application	The students should mention equipment that they have seen in an office they have been to.
Summary	Office equipment includes the tools, machinery and furniture that help employees perform their job efficiently. Office equipment are crucial for a modern office to increase productivity, streamline task and facilitate communication.
Student engagement: i. What have I learnt? ii. Skills acquired	
My Question(s)/Evaluation	
Action	

OFFICE EQUIPMENT

Office equipment are the tools and machines used in an office to achieve its organizational goals.

Some of the office equipment includes:

1 TYPEWRITER: This is an office machine used to reproduce handwritten documents in an official way. It makes the documents neater, clearer and easier to read than handwritten documents.

2 COMPUTER: This is an electronic device that accepts data, processes data and stores information.

3 PHOTOCOPYING MACHINE: This is office equipment that produces the exact copy of the original document.

4 STAPLING MACHINE: This is a simple machine used for holding two or more papers together.

5 PERFORATING MACHINE: This is used for punching neat holes on documents for easy filing.

6 DUPLICATING MACHINE: This is a machine used for producing several copies of a document using stencil.

7 FILING CABINET: This is used in the office to store business documents.

8 CALCULATING MACHINES: These are capable of performing all the processes of arithmetic ie addition, subtraction etc.

9 FRANKING MACHINE: This makes impression of stamps on envelopes.

10 SHREDDING MACHINE: This is used for destroying unwanted documents. It cuts papers into unreadable sizes.

11 GUILLOTINE: This is used for cutting or trimming the edges of office documents.

12 COLLATING MACHINE: This is used for sorting and stapling together printed documents having several pages.

IMPORTANCE OF OFFICE EQUIPMENT

1 They help to improve the quality of work.

2 They are more accurate.

3 They save time and labour.

4 They minimize the incidence of fraud.

5 They guarantee uniformity, neatness and legibility.

6 They enhance the goodwill and reputation of an organization.

7 They increase the output of workers.

8 It increase profit of an organization

DISADVANTAGES OF OFFICE EQUIPMENT

1 Some office equipment are too expensive to purchase and maintain.

2 Some machines can only do specialized jobs and cannot be put to other use.

3 The use of office equipment can lead to unemployment.

4 Some become obsolete ie outdated.

5 Some of them need skilled workers or experts to handle them.

FACTORS TO BE CONSIDERED WHEN SELECTING OFFICE EQUIPMENT

1. Cost and budget
2. Quality and Durability
3. The Ease of operation
4. Unit Standardization
5. Ability to save time
6. Maintenance cost
7. Staff Strength
8. Size and space
9. Safety factor
10. Energy consumption

CARE OF OFFICE EQUIIPMENT

1. Proper regular cleaning of the machines
2. They should be properly covered when they are not used
3. Instructions about usage should be followed as stated in the manual
4. Right parts and materials should be used always
5. Avoid keeping heavy objects on the equipment
6. Comply with temperature and safety instructions
7. Regular and adequate maintenance by the experts
8. If there is any fault, consult expert for repairs.

Date	
Topic	**INTRODUCTION TO COMMERCE**
Objectives	i. Define commerce ii. Explain the importance of commerce iii. Mention division of commerce iv. Explain home and foreign trade
Insight	Commerce can be defined as the exchange and distribution of goods and service Exchange means buying and selling, while goods and services make up products
Key words/New terms	Goods and services Trade (buying and selling) Aids to trade and entreport
Application	Describe how to do buying and selling
Summary	Commerce consists of exchange and distribution Exchange involves buying and selling with money as a medium Goods and services make up products Commerce makes a wide variety of goods available worldwide
Student engagement:	
My Question(s)/Evaluation	
Action	

INTRODUCTION TO COMMERCE

Commerce is a component of Business Studies which deals with the buying and selling of goods and services and all activities which assist trade.

Commerce can also be defined as any activity which involves the distribution of goods from manufacturers to the consumers and all who aid or facilitate this distribution

IMPORTANCE OF COMMERCE

- Commerce helps in the satisfaction of consumer needs.
- It increases the national income and wealth of a nation.
- It encourages international trade and inflow of foreign exchange.
- It creates link between the manufacturers, sellers and the buyers.
- It ensures improvement in the standard of living.
- It provides jobs opportunities

TRADE

Trade is the buying and selling of goods and services. There are basically two types of trade. They are home trade and foreign trade.

HOME TRADE: Trade is concerned with the buying and selling of goods and services within the same country to satisfy the wants of consumers. Another name for home trade is internal trade or domestic trade. Example, trade between Lagos and Enugu, Kaduna and Abia.

Division of Home Trade

- **Wholesale Trade:** This is the buying of goods in large quantities from the producer and selling in small quantity to the retailer. The person who engages in this type of trade is called a wholesaler.
- **Retail Trade**: This is the buying of goods from the wholesaler in small quantities and selling in units or bits to the final consumers. The retailer is the final link between the producer and the consumer.

FOREIGN TRADE

Foreign Trade is the buying and selling of goods between two or more countries. Example Nigeria and Ghana, Togo and USA. It is also known as international or external trade.

DIVISIONS OF FOREIGN TRADE

- Import Trade: This is the buying of goods or services from other countries to our own country. Example, Nigeria imports cars, electronics etc from other countries.
- Export Trade: This is the selling of goods or services produced in a country to another country who need them. Example Nigeria exports cocoa, crude oil etc to other countries.
- Entreport Trade: This is the re-exporting of goods already imported into a country to another country without adding values. Example, A trader in Nigeria can import electronics from China to Nigeria and re-exports the goods to other countries

AIDS TO TRADE

- These are those things which assist the actual buying and selling of goods and services. They are:
- **Transportation:** This involves the movement of raw materials, finished goods and individuals from one place to another.
- **Insurance**: This is a cover against risks and perhaps they eventually occur.
- **Banking:** Banks finance business and also provide saving facilities.
- **Advertising**: This is the act of creating awareness about the existence of certain goods and services.
- **Warehousing:** This is the process of storing goods in a big building till they are needed.
- **Communication**: This is the free flow of information from one place to another.
- **Tourism:** This is the act of visiting places of interest interacting and gathering skills which will be beneficial in further business transaction

CHANNEL OF DISTRIBUTION

- Manufacturer → Wholesaler → Retailer → consumer
- Manufacturer → Wholesaler → consumer
- Manufacturer → Retailer → consumer
- Manufacturer → Consumer

Date	
Topic	**PRODUCTION AND SERVICE DELIVERY**
Objectives	I. Define production ii. Explain types of production iii. State the factors of production iii. State the effects of production on the environment and society
Insight	Production covers all the activities involved in creating utility. Anything that satisfies human needs or wants is said to possess utility
Key words/New terms	Bringing or obtaining the natural resources Extractive activity Manufacturing and construction Positive and negative effect
Application	Have you ever seen where production of biscuit is done
Summary	Production is the creation of utility Utility is the amount of satisfaction derived from the consumption of a product Production is in three stages: primary, secondary and tertiary
Student engagement: i. What have I learnt? ii. Skills acquired	
My Question(s)/Evaluation	
Action	

PRODUCTION

Production is the making or creation of goods and rendering of services to satisfy human wants. All goods and services produced must possess utility, which means that they must be capable of satisfying certain human wants.

TYPES OF PRODUCTION

PRIMARY PRODUCTION (EXTRACTIVE): This is concerned with obtaining or digging up raw materials or natural resources from the sea, soil, forest or atmosphere for processing. The products of primary production are mainly in raw state and require processing. Production here covers agricultural products, mineral resources etc

SECONDARY PRODUCTION (MANUFACTURING): This involves turning the raw materials into semi-finished or finished goods. It consists of manufacturing and construction. Examples are manufacturing steel into cars, textiles into clothing, construction of bridges, roads etc.

TERTIARY PPRODUCTION (CONSTRUCTIVE): This involves construction of road all kinds of services like commercial, direct and indirect services. examples; banking, insurance, hairdressing, barbing, civil service etc.

FACTORS OF PRODUCTION

This is defined as the basic inputs or resources used in the production of goods and services. They include land, labour, capital and entrepreneur.

- **LAND:** This refers to the natural resources used in production of goods. It a free gift of nature. It includes forests, minerals, rivers, atmosphere etc. The reward for land is RENT.
- **LABOUR:** This is the physical and mental efforts directed towards production of goods. Labour can be classified into skilled, semi-skilled and unskilled labour. The reward for labour is WAGES AND SALARIES.
- **CAPITAL**: This refers to man-made tools and equipment that are used for further production of goods and services. It includes machinery, money, buildings, stock of goods etc. the reward for capital is INTEREST.
- **ENTREPRENEUR**: It the factor of production that co-ordinates and organizes other factors to make production possible. This is the person who makes major decisions for the organization and bears the risk of the business. He provides the money for establishing the business and ensures that all productive activities are carried out as planned. The reward for entrepreneur is PROFIT OR LOSS

EFFECTS OF PRODUCTION ON THE ENVIRONMENT

Positives effects of production on the society

- Provision of employment opportunities.
- It enables raw materials to be converted to finished products.
- Availability of variety of products.
- It increases standard of living of people in the society
- It increases wealth of people

Negative effects of production on the environment

- It causes environmental pollution.
- Reduces natural resources.
- Some products made by some industries are dangerous to human health.
- Destruction of plants and animals which leads to deforestation
- Global warming. This is the continuous rise in the temperature of the atmosphere of the earth caused by poisonous gases released by factories.

KNOWLEDGE AND SERVICE ECONOMY

This is an economy in which the production of goods and services is based primarily upon knowledge, skills and intellectual property rather than physical activities. It can be divided into two

1. Knowledge Economy

2. Service Economy

KNOWLEDGE ECONOMY: is an economic system in which growth is driven by knowledge, skills and information. It works mainly by using information technology, relying on education, skills and using research, data etc.

SERVICE ECONOMY: is an economic system in which growth is driven by provision of services rather than physical goods

OPPORTUNITIES IN KNOWLEDGE AND SERVICE IN ECONOMY

I. Information technology and digital services: the opportunities includes cloud services, data analysis, and AI, software development etc

2. Digital content and creative economy: opportunities here include; graphic design, video production, content creation

3. Online education and knowledge platforms: opportunities available include: online teaching, course creation, professional certification programs

4. Professional services: here opportunities include marketing research, legal services, Accounting, strategy advisory e.t.c.

5. Financial technology: opportunities here include marketing digital payments, mobile banking, digital lending platforms e.t.c.

6. Health and telemedicine services: opportunities available include medical data analysis, digital diagnostics, telemedicine platform e.t.c.

DIFFERENCES BETWEEN PRODUCTION OF GOODS AND SERVICES

	GOODS	**SERVICES**
1	Can be owned and transferred	Cannot be owned and transferred
2	Can be returned if unsatisfactory	Cannot be returned once provided
3	It is physical and can be touched	It is intangible and cannot be touched
4	It can be stored until needed	It cannot be stored
5	Quality can be objectively measured	Its quality is dependent on the service provider
6	It requires a manufacturing process	Manufacturing processes not required
7	Examples are cars, furniture, clothing	Examples are musicians, actors, teachers, doctors

THE ROLES AND IMPACTS OF ROBOTS IN PRODUCTION

Some of the positives roles and impact of technology are:

1. Enhancement of communication

2. Easy access to information and Education

3. Increases efficiency and productivity

4. Enhances economic growth easy marketing

5. It helps in reducing cost of production

Some of the negatives roles and impact of technology are:

1. It causes unemployment for unskilled workers

2. It creates unnecessary dependence on machines and robots

3. It makes standardization of goods easy

4. It eases customization of goods

5. It creates employment opportunities for technical and skilled workers

Date	
Topic	**CASHLESS ECONOMY**
Objectives.	The students should be able to : i. Define cashless economy ii. state the purpose of cashless economy iii. mention the types of digital payment system iv. state the challenges faced in cashless economy
Insight	A cashless economy is a system where transactions are primarily conducted through digital media such as credit/debit cards, mobile wallets, and online transfers rather than physical banknotes or coins
Key words/New terms	Online banking Digital wallet
Application	Students collecting money from the POS
Summary	People and businesses transfer money to one another digitally via credit or debit cards, mobile payment services, crypto currency etc. The policy requires that individuals and business carry out transactions through electronic means, such as mobile money, point of sales(POS) terminals and online banking.
Student engagement:	
My Question(s)/	
Action	

CASHLESS ECONOMY

A cashless economy is one in which individuals make purchases and pay for services without using actual physical currency, such as coins or paper money. Rather, they make payments through electronic means such as online banking system, debit and credit cards, mobile money and electronic funds transfer.

Cashless economy is a regulated system in which physical banknotes and coins are not accepted in financial transactions.

Cashless economy helps governments track money thus lessening corruption, reducing crime, and making it easier to keep track of money spent

PURPOSE OF THE CASHLESS POLICY

The primary purpose of a cashless policy as implemented by the central bank of Nigeria (CBN) are:

1. To reduce the use of physical cash in transactions and promote digital payments

2. To increase financial inclusion, reduce corruption and improve the sufficiency of the economic system

3. To drive development and modernization of our payment system

4. To reduce the cost of banking services including cost of credit

5. To improve the effectiveness of monetary policy in managing inflation

TYPES OF DIGITAL PAYMENT SYSTEM

Below are some of the common digital payment system in use:

1. Mobile money

2. Unstructured supplementary service data (USSD)

3. Point of sales (POS)

4. Online or internet banking

5. Credit or debit cards

6. Digital wallets

7. QR codes

8. Crypto currency

CHALLENGES OF BUSINESSES AND CONSUMERS IN A CASHLESS ECONOMY

Some of the key challenges are:

1. Digital literacy gap

2. Poor power supply

3. Inadequate internet access

4. Internal related crime

5. Inadequate financial institution

6. Cost of transaction

7. Technical or system failure

MITIGATION OF CHALLENGES BUSINESSES AND CONSUMERS FACE IN A CASHLESS ECONOMY

The following are some of the solutions or ways to reduce the challenges faced by businesses and consumers in a cashless economy:

1. Investing in digital infrastructure

2. Financial sensitization and literacy

3. Enhance cyber security

4. Strengthening of data privacy

5. Development of user- friendly systems

6. Promotion of financial inclusion

7. Cost of transaction

8. Dependence on technology

Date	
Topic	**DIGITAL CURRENCY**
Objectives.	The students should be able to : i. Define digital currency ii. mention the types of digital currency iv. state the benefit and risk of digital currency
Insight	Digital currency is a form of money or currency that exists solely in electronic or digital form, with no physical counterpart like paper bills or coins
Key words/New terms	eNaira Crypto currency
Application	Students should be able to make online transaction
Summary	Digital currency is any currency, money or money-like asset that is primarily managed, stored or exchanged on digital computer systems
Student engagement:	
My Question(s)/	
Action	

DIGITAL CURRENCY

Digital currency is a form of currency that exists only in digital or electronics form. It is a currency that is not in physical form like coins or the naira note.

TYPES OF DIGITAL CURRENCY

Nigeria mainly uses two types of digital currency, these are

1. The eNaira

2. The crypto currency such as Bitcon

The eNaira is a digital form of the physical naira and functions as legal tender, aiming to increase financial inclusion.

The eNaira is a central bank digital currency (CBDC) issued by the central bank of Nigeria as a legal tender. It is the digital form of the physical naira and can be used the same way as cash.

Cryptocurrency are decentralized digital currencies not issued by any central authority, that use the required coding for currency security. Examples are Bit coin, dash and ripple.

BENEFITS OF DIGITAL CURRENCY

Below are some of the benefits of digital currency in Nigeria

1. Quick transfer of money between persons without intermediaries

2. It promotes the cashless policy

3. It serves as cash alternatives

4. It lowers the cost of printing and handling of cash

5. It reduces illegal activities such as fraud and money laundering

6. It will help to check tax evasion in the country

7. It boosts financial inclusion as bank accounts are not required to hold digital currency

RISKS OF DIGITAL CURRENCY

1. Existence of cyber attacks

2. Phishing scams risk

3. Online fraud and risk of losing money

4. Loss of monetary control

5. Hindrance to bank infrastructure innovation

Date	
Topic	**DIGITAL TECHNOLOGIES IN BUSINESS**
Objectives.	The students should be able to : i. define digital technology in business ii. state the importance of digital technologies in business iii. mention the basic digital tools and applications in business organization iv. mention the concept of responsible digital citizenship
Insight	Digital technology is the use of electronic systems to create, process, store and share information as separate digital signals.
Key words/New terms	Digital Technology
Application	The students should be able to make use of the computer and smartphone To do some work
Summary	Digital technology in business refers to use of electronic tools, systems, and software such as AI, cloud computing and data analytics to automate processes, enhance customer experiences, and create new, efficient business models
Student engagement:	
My Question(s)/	
Action	

DIGITAL TECHNOLOGIES IN BUSINESS

Digital technology is the use of electronic system to create, process, store and share information as separate digital signals.

Digital technology refers to the use of electronic devices, systems, and applications to perform business operations such as buying, selling, record keeping, communication, and data analysis.

IMPORTANCE OF DIGITAL TECHNOLOGIES IN BUSINESS

The following are some of the importance of digital technology:

1. Digital technology helps in communication between families and friends staying faraway

2. It helps government and corporate bodies to exchange information easily

3. It improves productivity and efficiency

4. It increase access to information

5. It makes learning and decision making easy and accurate

6. Digital technology has made online learning and teaching easy

BASIC DIGITAL TOOLS AND APPLICATIONS IN BUSINESS ORGANISATION

Below are some of the basic digital tools and applications used in business organization

I. Production software

2. Communication platforms

3. Project management tools

4. File storage and sharing tools

5. Specialized tools

6. Marketing tools

7. Efficiency

SELECTION OF APPROPRIATE DIGITAL TECHNOLOGY TO PERFORM SPECIFIC BUSINESS OPERATIONS

Below are some of the digital technologies now commonly used to perform business operations

1. Computer and smartphone

2. Internet and web browser

3. Email tools and services

4. Messaging Apps

5. Video conferencing Apps

6. Artificial intelligence and robotics

RESPONSIBLE DIGITAL CITIZENSHIP

Some key aspects of responsible digital citizenship are:

1. Online safety and security

2. Respect and empathy

3. Digital literacy and critical thinking

4. Digital rights and responsibility

5. Promoting positive online behavior

Date	
Topic	**DIGITAL TECHNOLOGIES IN THE FINANCIAL INDUSTRY**
Objectives.	The students should be able to : i. define digital technology in the financial industry ii. state the types of digital technology in the financial industry iii. state the uses of digital technologies in the financial industry iv. mention the challenges of digital technologies v. state how to overcome the challenges
Insight	Digital technologies including artificial intelligence, block chain, cloud computing and mobile connectivity are transforming the financial industry by accelerating automation, reducing costs and increasing accessibility
Key words/New terms	Digital Technology
Application	The students should be able to make use of the computer and smartphone and artificial intelligence to do some work
Summary	Digital technology in financial industry is rewriting finance right now not just apps, but how money moves and decisions get made.

DIGITAL TECHNOLOGIES IN THE FINANCIAL INDUSTRY

Digital technologies in the financial industry means the integration of technology like AI, big data and mobile platforms to modernize and automate financial service.

TYPES OF DIGITAL TECHNOLOGIES IN FINANCIAL INDUSTRY

The following are some of the digital technologies commonly used in the financial industry in Nigeria.

1. Automated teller machine (ATM)
2. Point of sale (POS)
3. Mobile and online banking
4. Artificial intelligence (AI)
5. Digital banking
6. Accounting software

USES OF DIGITAL TECHNOLOGIES IN THE FINANCIAL INDUSTRY

Digital technologies are used in the following key areas in the financial industry

1. Mobile and online banking
2. Digital payment
3. Data management
4. Unstructured supplementary service data (USSD)
5. Central bank digital currency – eNaira
6. Artificial intelligence (AI)
7. Bank verification number (BVN)
8. Biometric authentication
9. Cyber security

CHALLENGES OF DIGITAL TECHNOLOGIES IN THE FINANCIAL INDUSTRY

1. Persistent cyber security threats
2. Unreliable power supply
3. Poor internet connectivity

4. Economic instability

5. Frequent policy changes

6. Cyber security risks and fraud

7. Consumer distrust

HOW TO OVERCOME CHALLENGES OF DIGITAL TECHNOLOGIES IN THE FINANCIAL INDUSTRY

1. Provision of reliable power supply

2. Expand internet connectivity

3. Implement robust cyber security

4. The cost and process of obtaining licenses should be reduced and simplified

5. There should be nationwide campaigns to educate consumers about safe digital banking practices, common cyber threats and the benefits of digital finances
